PREFACE

For an informed management regime to ensure sustainability of the marine fisheries, it is essential not only to have reliable information on the status of marine fish resources along with fishing effort expended but also the number of fishing villages, landing centres, fisherfolk population, their occupation status, fishing crafts, fishing gears and other related parameters. With this objective, the Central Marine Fisheries Research Institute (CMFRI), Cochin has been conducting frame surveys at periodic intervals. Marine fisheries census on an all India basis was last conducted by CMFRI during May – July, 1980. Since the last census, the marine fisheries in India have witnessed both qualitative and quantitative changes. Post 1980 was also been a period where a number of management/policy interventions were made by the Government of India and the maritime states for ensuring sustainability, conservation of resources and to protect the interests of artisanal fishermen. Surely, the policies and interventions need to be reviewed and fine tuned in view of the highly dynamic nature of marine fisheries. For this a strong realtime and reliable database on various aspects of marine fisheries is essential. Recognising such a need, Department of Animal Husbandry, Dairying & Fisheries (DAHD&F), Ministry of Agriculture (MOA), Govt. of India, has taken up during the 10th Five Year Plan, a programme on Strengthening of Database and Information Networking for Indian Fisheries Sector in which Marine Fisheries Census is a major component. Recognising the expertise and experience of CMFRI in conducting such massive census surveys, the DAHD&F, MOA has entrusted the task of conducting the All India Marine Fisheries Census in the mainland to CMFRI.

Frame of the survey, namely, the marine fishing villages available with CMFRI was validated and updated with the latest information obtained from the respective maritime states. After identification of census parameters such as the population size, education, religion, occupation, number of crafts and number of gears etc., the necessary schedules were designed to collect information and these were approved by the Technical Monitoring Committee set up by DAHD&F, MOA.

The census was conducted in two phases with the first phase covering all the maritime states and Union Territories except Tamil Nadu and Pondicherry which were covered during second phase. The first phase was conducted during April-June, 2005 and the second during November-December, 2005. Over 300 CMFRI staff (Scientific and Technical) supervised the field level and zonal level census operations ensuring proper collection of relevant data. A total of 1492 field enumerators mostly drawn from the fishing communities/fishing villages covered 3,202 marine fishing villages. After completion of the census in both the phases, the data were sent to headquarters for processing and preparation of reports. The software required for data entry, data validation and processing was developed by the scientists of Fishery Resources Assessment Division, CMFRI.

The final report (containing two parts) on the marine fisheries census on an All India basis with respective state summaries including the scope, census parameters, their definitions, the types of schedules and instructions for collection of data was released by Shri.P.M.A. Hakeem, I.A.S., Secretary, DAHD&F, Ministry of Agriculture, Govt of India on 25 July 2006 at Krishi Bhavan, New Delhi.

The rapid census exercises and the information supplied by the state department resulted in the finalisation of 641 marine fishing villages spread over six districts. Conscious efforts were made to avoid villages that were estuarial and other inland fishery regions. Further in the villages only those households were selected where at least one member of the family was involved in marine fishing or allied activities. This publication (Part III of the Census report) summarises the districtwise census data of Orissa covering a range of information right from the population bifurcation among Orissa fisherfolk to the ownership pattern of different crafts, either full or partial. For a better understanding of the craft and gear ownership vis-à-vis occupational fishing, specially assorted information on number of households, which thrives by fishing without any wherewithal, has also been presented. Such incisive processing will be of much use to the planners and state authorities, whose primary objective is targeted towards the 'have-nots' of fishery. This report contains an exhaustive list of fishing villages of Orissa along with their socio-occupational profile

including the craft and gear infrastructure segregated sector-wise.

I take this opportunity to thank the DAHD&F and the Indian Council of Agricultural Research (ICAR) for entrusting CMFRI with this onerous responsibility, which has been completed within a reasonable time span. Special mention is required to laud the role played by CMFRI personnel especially Dr. G. Syda Rao, SIC, Visakhapatnam Regional Centre of CMFRI and the associated scientific and technical staff who made this venture a success with their dedicated and tireless efforts. I hope this report in this current shape and form will be of immense utility to the quintessential observer of Indian Marine Fishery.

SUMMARY

Marine Fisheries Census 2005 was carried out in six districts of Orissa namely Balasore, Bhadrak, Kendrapara, Jagatsinghpur, Puri and Ganjam during April-June 2005. The scope, time frame, the parameters, their definitions and types of schedules used are described in Part I and Part II of the Marine Fisheries Census Report. The salient features are summarised below:

- There were 641 marine fishing villages in Orissa out of which 276 were in Balasore, 116 in Jagatsinghpur, 109 in Kendrapara, 79 in Bhadrak, 35 in Puri and the remaining 26 were in Ganjam district.
- The total number of fishermen households was 86,352 of which 41% were in Balasore district, 15% in Jagatsinghpur, 13% in Bhadrak, 12% in Puri, 10% in Ganjam and 9% in Kendrapara district.
- Marine fisherfolk population in Orissa was 4,50,391. Adult male constituted 32%, adult females 28% and children 40% of the population. Average population per village was 703 and the average family size was 5.22. Fisherfolk concentration was higher in Ganjam district followed by Puri. Female to male ratio was 904 for 1000 males.
- In Orissa 32% of the fishermen possessed primary level of education 13% secondary level and 4% possessed above secondary level of education. About 51% of the fishermen population has no formal education. Nearly 60% of the marine fisherfolk in Kendrapara district have some level of formal education followed by Jagatsinghpur (53%), Balasore (49%) Bhadrak (37%), Puri (33%) and Ganjam (15%).
- About 98% of the fisherfolk families were Hindus and more than 55% of the fishermen families belonged to either scheduled caste or scheduled tribe.
- The number of fishermen engaged in actual fishing is about 1.2 lakh forming 27% of the marine fisherfolk population. Out of which 62% were full timers, 28% were part time fishers and the remaining 10% were occasionals. More than 75% of the fishermen in Ganjam, Kendrapara and Puri were full timers, while part time fishermen were maximum in Balasore, Jagatsinghpur and Bhadrak districts.
- Nearly 34% of the fisherfolk earned their livelihood from allied activities like marketing, repairing/making of nets, curing, peeling, labour and other fishery related activities. Most of the males were engaged in occupation such as repairing/making of nets (33%), labour (27%), and marketing (21%) while female involvement is higher in curing (33%), marketing (20%), labour (19%) and repairing /making of nets (13%).

- 8% of the fisherfolk families were having membership in co-operative societies out of which 50% have membership in fisheries co-operatives. Co-operative membership is maximum in Jagatsinghpur district.
- Trawlers, gillnetters and dolnetters are the main crafts of the mechanized sector and plank built boats and catamarans were more in the artisanal sector. There are 23,740 craft **in the fishery** employed in marine fishing of which 3,577 are mechanized; 4,719 are motorized and the rest are non-motorised. Gillnetters and trawlers account for 87% of the mechanized craft. There were 1,340 mechanised trawlers of which 589 were in Balasore and 503 in Jagatsinghpur District.
- Orissa marine fisherfolk **owned** 21,110 crafts out of which 12% were mechanized, 20% were motorized and the remaining were non-motorised craft. The number of families having shares in fishing craft was maximum in Balasore followed by Jagatsinghpur and Puri.
- Important gears of Orissa were gillnets, fixed bagnets, hooks & lines, seines and trawl nets. Sharing pattern is more visible in fixed bagnets, driftnet and seine nets.
- Nearly 30% of the fisherfolk families involved in fishing possess neither craft nor gear.
- Only 13% of the fisherfolk families were found to own some electronic gadgets / life saving equipment.
- In Orissa, nearly 73% of the houses where marine fisherfolk families live were found to be pucca.
- There were about 900 educational institutions in the marine fishing villages of which 71% are primary schools, 26% are secondary.
- About 72% of the marine fishing villages were electrified and 71% were connected by road.
- There were only 27 ice factories and 12 boat building yards located in the marine fishing villages.

TABLES

Marine Fisheries Census 2005

TABLE 1. DISTRICT PROFILE

District	No. of landing centres	No. of fishing villages	No. of fishermen families	Fisherfolk population
Balasore	9	276	35,478	188,619
Bhadrak	9	79	10,945	66,992
Kendrapara	4	109	8,068	45,751
Jagatsinghpur	2	116	13,330	65,987
Puri	12	35	9,972	45,575
